Startling Facts About the Street-Cleaning Department.

The deeper one digs into the records of the Street-Cleaning Department of lew York, the more astonishing appear the extravagance which has prevailed in that department, and the more waste ful appears to have been the expenditure of public money.

"The Evening World" has already proven an absolute waste of nearly \$70. 00 in the purchase of ash-cart horses and an undue extravagance of \$119,00 expenditure for horse feed, during the two years' administration of Thomas 8 Brennan, Street-Cleaning Commissioner

The citizens and taxpayers of New York who are compelled to pay each year an enormous revenue for street cleaning purposes, over two millions of follars being appropriated annually, will be interested to learn that thousands of dollars have been wasted in the "final department of the city

For upward of ten or twelve years
the Street-Cleaning Department, not
swaing ash and garbage scows of its

flatboats or scows from the firm known

The city of New York pays simply for
the use of the Barney Company's scows,
and the cost of propelling them and the
cost of loading and unloading them is
defrayed in other ways, and the money
paid to other contractors.
In 1889, before "Big Tom" Brennan became connected with the Street-Cleaning Department, the city paid about

On the 1st of January, 1893, during Brennan's administration, this cost was further increased to about \$7,000 per month for the use of twelve scows. Each scow cost about \$19 per day.

During the last month that Brennan officiated as City Street-Cleaning Commissioner, the cost to the city for the rental or use of twelve scows was over \$8,500 per month; each scow costing \$24 per day. per day,

The books and records of the First Auditor of Accounts in the Comptroller's office tell the story in plain figures.

A glance at the montary record of the money paid to the Barney Company during Breman's administration will disclose the fact that on April 1 last the amounts paid for the use of scows suddenly intrased, with no cause or reason.

Rere is a waste of many thousand dol-

Was there a deal and a "divvy?"

The figures quoted herein include Was there a deal and a "divvy"

The figures quoted herein include every day in the year, Sundays and holidays, as well as week days. The rate per day for each scow is computed for the entire thirty-one days of the month. The difference in the rate of 1892 and that of 1893 amounts to 5 per day for each scow. As there are now twelve scows used by the Street-Cleaning Department, there has been a "waste" of \$108 per day since April 1, 1893.

The "waste" therefore, for April was \$3,200; for May \$3,345; for June, \$2,240; and for July, \$3,345, making \$13,176 waste during the last four months of Brennan's administration. And this "waste" is still continuing.

The Barney Dumping Boat Company controls a patent on its automatic self-dumping boats. The most of its scows are built of fron as an experiment and at an increased cost.

M. Hubbe, the boat builder, of 24 State street, built and constructed for the Barney Dumping Roat Company a number of its patent scows at a net cost of \$14,000 for the wooden boats, and \$18,000 for the experimental fron boats.

M. Hubbe was interviewed by an Evening World" reporter yesterday.

When he was asked what would be a fair price for the city to pay for its rental of the Earney scows, he said:

"A fair, conservative, profitable price for the use or rental of these scows as the conservative profitable price for the use or rental of these scows.

In reality the farcical investigation held by Owen and Wahle, Commissioners of Accounts, into the method of buying gah-cart horses was the veriest "bluff."

There is abundance of material at hand for further investigations, as "The Evenling World" has discovered other extravagances and wasteful expenditures of money in the Street-Cleaning What a handsome "divy" there is in the commissioners of these patent dumping boats.

Kansas City Young Man Mortally
Wounds a Street Robber.

(By Associated Press.)

KANSAS CITY, Mo., Dec. 18.—An unstrained with the street searly this morning, and was fallilpooter, and the manager of the Exter Operation.

The boys obtained the lithographs from a local bill-poster, and the manager of the Exter Operation.

The would-be robber received a bullet directly over the heart, and, though weakened by love of blood, fought hard before he could be arrested. He refused to divulge his name.
